

The Greek breathable cane

In the year 2017 Greece is still treading with the compass of the memorandum commands of its creditors. Fear, extortion, threats and a destructive economic policy for the country and for the people's majority compose the profile of modern Caligula type power elite.

The staff of the armed forces, like the rest of the people, are trying to find patriotic orientation and to survive financially in this whirlwind (Laelaps).

The dominant political parties - as people 's representatives – due to the fact that they are subordinate to the memorandum callings are completely disreputable in the consciousness of the average Greek. But on the other hand, there is no regulated and dynamic resistance in this carnage yet. There is no specific and persuasive release plan from the memorandum yoke and the forces which can resist it, are broken and without confidence.

Most of the Greek youth are unemployed or have migrated to other countries seeking work. Labor rights have been put in the bed of Procrustes. Retirees, on the other hand, are struggling not to lose the last traces of dignity from their pensions and the health care that are coveted by the rodents of memorandum.

Greece occupies a key geostrategic position. The European Union needs it as a reliable partner for the external borders safekeeping and for overcoming the refugee crisis, as it was written in an article in the Sueddeutsche Zeitung on January 26, 2017. The staff of the armed forces are the ones who have mainly taken on the management of refugee - immigration from the time of their entry into the country, to their place in the camps and of course are subdued to the greater work pressure.

Nevertheless, the lenders are seeking more wages and pensions decline of the military personnel. They do not take into account that is pending, with published final decisions of the supreme courts of Greece, economic returns from the Government to the special payrolls and pensions. They do not take into account that the already our budget cuts are more than 55% average. They want to make us even more poor and insecure after seven years of catastrophic crisis management.

The Greek people need real solidarity of Europe's workers and the entire free world. The people cannot be subservient to the elite of international power and money, political expediency and blackmailing dilemmas with the financial debt as a gun. We must stop them!

Efthimios Gkitersos - ANEAE
