## EUROMIL Analysis “2 Years Strategic Compass”

*The implementation of the Strategic Compass demands **sustained commitment** from all Member States and effective and efficient coordination to ensure its success...EUROMIL continues to make it a point that this extensive cooperation across borders under the European flag must go hand in hand with a **synchronisation and coordination** of social and working conditions and the associated protection of the personnel involved...**the momentum is now to build a strong European Union in defence.***
